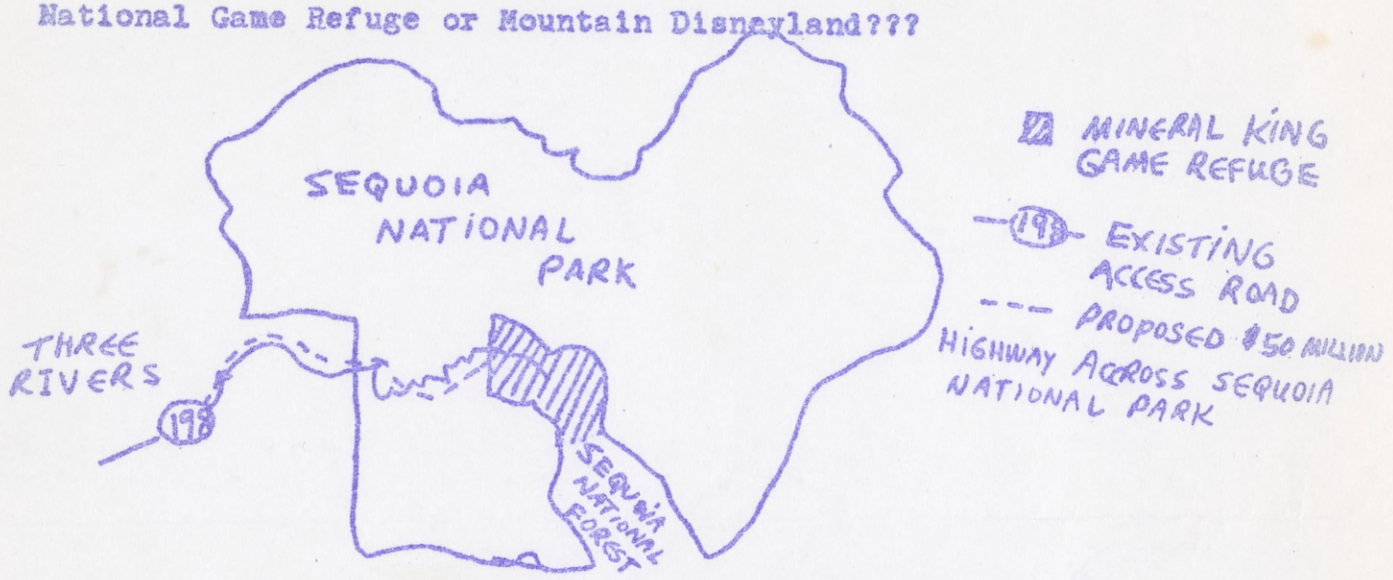
MINERAL KING

National Game Refuge or Mountain Disneyland???



Why did the U.S. Forest Service approve the proposed Disney project on this public National Forest land without public hearings?

Why did the U.S. Forest Service estimate the cost of the proposed highway through Sequoia National Park, which is only to serve the development, at $5 million in 1965 when it was obvious the cost is much greater?

Why did the Disney Company deny the existence of one of their own employees when he was killed in Mineral King Valley testing their avalanche control systems?

Why did a Disney spokesman say, after the series of avalanches which killed employee Randy Kletka, "We can now move the snow when we want it to, not when it wants to."

Why did the Forest Service request a $3 Million development, but accept the Disney bid for a $35 Million Mountain Disneyland?

I am a 22 year-old Cal Poly student who, concerned with the deterioration of our country's natural resourses, has done extensive research on these and other questions concerning the proposed Disney development in the Mineral King Game Refuge. I feel a personal responsibility to express my informed opinions concerning this project. Please allow me to share my beautiful slides on Mineral King with your group. My program, which has been given many times to various groups, is available almost anytime. Feel free to contact me.

Sincerely,

Bruce Patrovsky
